About me

I love JavaScript and magic. Magic is not available to me, so I'm studying for a front-end developer.

I am independent and proactive; I know how to argue my point of view. I have the skills of self-organization and self-discipline, planning and managing priorities of tasks, searching and analyzing new information for myself, skills of working on mistakes.

I strive to become a professional front-end developer and bring a little magic to the world.

Skills

- HTML5
- CSS3
- JavaScript (Basic)
- React (Basic)
- Tools
 - Scss
 - Gulp
 - Git
 - Github
 - Figma, Photoshop
- Methodologies:
 - BEM

Experience

healthy-mama | [code](#) | [project page](#)

toxin | [code](#) | [project page](#)

memorize cards | [code](#) | [project page](#)

Education

Courses:

2021 - 2022 | JavaScript and React | [Udemy](#)

2019 - 2020 | HTML and CSS | [HTML Academy](#)

College:

2009 - 2012 | paramedic | Sverdlovsk regional medical college

Code Example

Task: write a function that takes the amount of handshakes and returns the minimal amount of people needed to perform these handshakes.

```
function getParticipants(handshakes) {  
  
  let count = 0;  
  
  if (handshakes === 1) {  
  
    return 2;  
  
  } else if (!handshakes) {  
  
    return count;  
  
  } else {  
  
    for (let i = 1; handshakes > 0; i++) {  
  
      handshakes -= i;  
  
      count++;  
  
    }  
  
    return count + 1;}  
  
}
```

```
console.log(handshakes(15));
```
